Description
A well illustrated look at the geology, flowers and walks in the Alps
Geological histories of oil reserves, includes folded map
Palaeontological Association photographic classification of invertebrate fossil groups
250 colour photos include folds, shear zones, faults, veins, boudins and mullions
Geological guide to Plateau des Domes, Sancy Massif, Cantal Complex & Haute Loire
Provides basic guide to field techniques
Booklet packed with walks showing the geology of The Lizard Peninsular
Includes plate tectonics of course, and subsequent advances in geology
British Geological Survey regional guide
Pevsner's classic guide to architecture
Visitors' guide to the volcanic geology of the 7 main islands of the Canaries
British Geological Survey regional guide
Well illustrated booklet on Carboniferous forests and their fossils
An introduction to use of thin sections with good colour photos
Booklet gives an outline geological history with suggestions of places to visit
Geological guide to the Troodos Massif and surrounding areas with excursions
The story of Arthur Holmes and dating the earth
The demise of the Iapetus Ocean and the development of the border area of Scotland
Concise and informative dictionary for wide audience
Palaeontological Association guide to dinosaur species found in the coastal cliffs
Describes the latest fossils and technological discoveries
The physical geology of the earth with illustrations, maps and tables

Fascinating facts on the earth's history
Over 150 stunning satellite photographs, (very large book in cupboard in MMH)
Impressive photos with text tell the story of the development of the earth
Story of the discovery of earth's immensely long history over the last 400 years
British Geological Survey regional guide
Study of fossils as communities in changing environments over time
Well illustrated and acclaimed textbook for beginners and more advanced students
Geological Society Special Publication research papers on evaporite deposits
Looks at this tiny spiky worm and the end Ordovician extinction
A history of coal and its effects on the earth and its inhabitants, especially diseases
Describes the many fossils in these late Triassic rocks
Well researched account of the great fossil collector's life and discoveries
Geological Society Special Publication on the complexities of geological exploration
A geological history of Britain and how this influenced history, culture and art
A geological history of Powys followed by 15 field trip itineraries
Simple techniques, useful tips and detailed examples on how to draw rocks successfully
The varied geological history written for undergraduate geologists and professionals
A geological history designed for geology undergraduates and A-level teachers
A booklet guide to the geological map of UK with more detail of some areas
Clear and informative photographic guide to many geological structures
G. A. guide includes Wren's Nest and the Lickey Hills
G. A. guide includes the Usk, Woolhope, May Hill and Tortworth Inliers
G. A. guide covers coast from Bude to Tintagel
G. A. guide covers Lands End, the Lizard, around St Agnes, Falmouth and Mount's Bay

G. A. guide includes 15 itineraries
G. A. guide covers Dartmoor, Kit Hill, the Start complex and local bay areas
G. A. Guide to Lley Peninsular in northern Wales
G. A. guide includes Black Venn, Stonebarrow Hill, Golden Cap and Chesil Beach
G. A. Guide includes part of Peak District, Charnwood and Jurassic uplands
Easy to use, well illustrated informative guide, and not limited to the road side
Well illustrated GCE and A Level geology textbook
Small book describes the best sites for local geology and rock types
Line drawings explain formation of features
The geological story of the UK combined with how to walk it
Clear explanation of the varied rocks and landscapes of the UK
Booklet produced for TVGS first field trip May 2018
Booklet produced for TVGS field course, autumn 2019
British Geological Survey detailed explanation of the Droitwich map 182
British Geological Survey Memoir for 1:50 000 geological sheet 199
Explains rock and landscapes of the red coast from Exmouth to Lyme Regis
Geological trails through 6 Oxford cemeteries
Illustrated account of the varied geology of Oxfordshire
A description of the geology with b & w illustrations
Comprehensive account of the geology of Scotland
Updated account of varied geology of Shropshire, for all levels of interest
Detailed geology especially strong on sequence stratigraphy
Provides clear explanations of complex geological processes
Guide to walking the Geopark Way in 17 sections

Quirky look at geologic wonders from acastra gneiss to zircon
Well illustrated A Level and 1st year undergraduate textbook
A concise and readable introduction with photos, maps, and diagrams
Describes in words & photos the 17 sorts of stones that make up Britain's mountains
More than 50 UK localities are described with over 500 colour photos
Local research with plenty of diagrams and photos prepared for the TVGS
Geological guide to the Gulf of Corinth in Central Greece with excursions
An excellent guide designed for a wide audience, packed with information
A simplified, chatty geological history of the British Isles and Ireland
Describes the 3 billion year geology of Scotland's Northern Highlands
Examines the quaternary ice age and its changing landscapes and ecosystems
Guide to the exceptional geology of Iceland with excursions
Describes the geology on 4 trails
Easily accessible and comprehensive introduction to geology
Easily accessible introduction to geomorphology
Accessible introduction to metamorphism
Easily accessible introduction to mineralogy
Easily accessible introduction to natural resources
Easily accessible introduction to palaeontology
Easily accessible introduction to sedimentology
Accessible introduction to sea level change
Accessible introduction to stratigraphy
Easily accessible introduction to tectonics and structural geology
Easily accessible introduction to planets and their moons

Easily accessible introduction to volcanology
Leads students from simple geological structures to more advanced mapping
Classic American textbook comprehensive and well illustrated
Includes Somma-Vesuvius, Campi Flegrei, the Aeolian Islands and Mount Etna
Founder of modern geology whose fieldwork proved the earth to be immensely old
The story of the eminent 19th century geologist
Describes the various rocks in the Lake District and where to find them
